

The Faculty of Sports & Exercise Medicine supports Anti Doping

The Faculty of Sports & Exercise Medicine is committed to supporting National and International efforts to protect athletes' fundamental right to participate in doping free sport and thus promote health, fairness, and equality for athletes worldwide.

The Faculty fully supports the work of WADA at an International level and also the work of the Anti Doping Unit of the Irish Sports Council in the Republic of Ireland and UK Anti Doping (UKAD) in Northern Ireland, and will work with these agencies to provide information to practitioners dealing with athletes to help keep up with the latest regulations.
